

AUTODYNAMICS CORPORATION

AUTODYNAMICS CORPORATION • 2 BARNARD STREET • MARBLEHEAD, MASSACHUSETTS 01945 • (617) 631-8500

Ray Caldwell announced that Autodynamics Corporation would again build and overhaul engines and that Autodynamics would send parts and accessories to races in the New England area in a new Chevy van.

The addition of the above services to the present race car sales, accessory sales, service shop, machine shop, metal fabrication shop, and fiberglass facilities gives Autodynamics the capability of servicing every race car need.

Caldwell said, "Experience has shown that we need to build our own engines in order to ensure that our customers remain competitive and get good service. We are consequently pleased to retain the services of Doug Fraser to run our engine facility. Doug built the Super Vee motor with which I won two National races and scored a second during 1970. He also built Skip Barber's 1969 National Championship Formula Ford engine and assisted in development and assembled Skip's 1970 National Championship Formula Ford engine."

Autodynamics Corporation will carry a complete line of accessories for race cars, dune buggies, Volkswagen and Corvair engines. Bob Fletcher will handle race car sales and service and is available at (617) 631-8500.

The Autodynamics line features:

- * Caldwell Race Cars
- * Lola Race Cars
- * Hewland Gearboxes
- * Formula I Fire Control Systems
